Health Center Quality Measurement Systems

A Guide to Clinical Performance Measurement Sets

Table of Contents

HEALTH CENTER QUALITY MEASUREMENT SYSTEMS	2
INTRODUCTION TO THE TOOLKIT	2
CHAPTER 1: MEASUREMENT SET SUMMARIES	4
HEALTHCARE EFFECTIVENESS DATA INFORMATION SET (HEDIS)	5
PRIMARY CARE PROVIDER QUALITY IMPROVEMENT PROGRAM (QIP)	10
FACILITY SITE REVIEW	17
UNIFORM DATA SYSTEM (UDS)	21
CHAPTER 2: UDS MEASURE PROFILES	24
CERVICAL CANCER SCREENING	25
COLORECTAL CANCER SCREENING	27
PRENATAL AND POSTNATAL CARE	29
CHILDHOOD IMMUNIZATIONS	31
IMMUNIZATIONS FOR ADOLESCENTS	33
CONTROLLING DIABETES	35
CONTROLLING HIGH BLOOD PRESSURE	37
TOBACCO CESSATION AND COUNSELING	39
MONITORING FOR PATIENTS ON PERSISTENT MEDICATIONS	41
ADULT WEIGHT ASSESSMENT AND FOLLOW-UP	43
WELL CHILD VISITS IN CHILDREN AGE 3-6 YEARS	47
WEIGHT ASSESSMENT AND COUNSELING – CHILDREN & ADOLESCENTS	49
CHAPTER 3: DETAILED QUALITY MEASURE CROSSWALK	51
DETAILED MEASURE CROSSWALK: HOW TO USE THE ATTACHED SPREADSHEET	52

Health Center Quality Measurement Systems

A Guide to Clinical Performance Measurement Sets

Introduction to the Toolkit

This toolkit is designed for use by clinical and operational staff working in primary care health center and clinic settings in Northern California. The content of this toolkit was developed by staff from two regional clinic consortia, Health Alliance of Northern California and North Coast Clinic Networks, and Partnership HealthPlan of California (PHC).

This guide is intended for use as a primer on the various quality measurement sets that are currently in use by the Medi-Cal managed care plan and federally qualified health centers. Medi-Cal is California's Medicaid program. The measurement sets reviewed include the following:

- Healthcare Effectiveness Data and Information Set (HEDIS)
- Primary Care Provider Quality Improvement Program (QIP)
- Facility Site Review (FSR)
- Uniform Data System (UDS)

The measurement systems explored in this toolkit are those used by Partnership HealthPlan of California to monitor and incentivize provider performance and improvement in primary care service delivery in the Northern Region (i.e., HEDIS, FSR and QIP) and the federal measurement set for federally qualified health centers (UDS).

This guide is organized into three sections to provide progressively deeper levels of detail on the measurements sets. Each section includes an overview that orients readers to the purpose, content, and suggested use for the material. The three sections include:

1. Measurement Set Summaries – provide high-level overviews of each measurement set, how data is collected and reported, and primary purpose for measurement.
2. UDS Quality Measure Profiles – explores the importance and impact of health measure through a look at health center performance on 2017 UDS measures.
3. Quality Measure Specification Comparisons – serves as a reference with detailed comparisons of measure definitions, documentation requirements, and reporting specifications by measure.

This toolkit is designed specifically for the community clinics and health centers serving a nine county region in Northern California, including Del Norte, Humboldt, Lake, Lassen, Mendocino, Modoc, Shasta, Siskiyou, Trinity. These counties are part of three of Partnership HealthPlan of California’s HEDIS reporting regions: Southwest, Northwest and Northeast (pictured below).

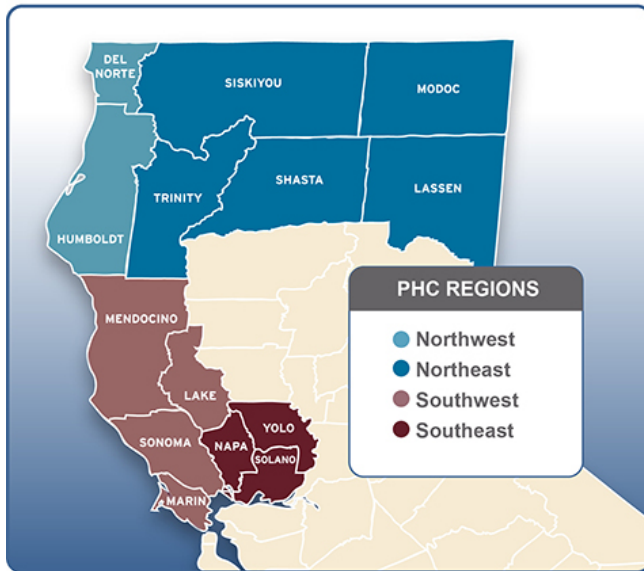

Figure 1. PHC HEDIS Regions

Data reported in the UDS Quality Measure Profiles are collected from the health centers serving the counties in the Southwest Region (rose – Mendocino and Lake), Northwest Region (teal – Del Norte and Humboldt counties) and the Northeast Region (blue – Lassen, Modoc, Siskiyou, Shasta, and Trinity).
