Chapter 2: Quality Measure Profiles

Datasets that Report Health Center Performance on Clinical Quality Measures

Purpose

To provide context for understanding the importance of each clinical measure in health center settings.

Overview of Content

- Impact of Health Issue in Rural Northern California
- How Health Centers Provide the Necessary Care
- Rural Northern California Health Center Data
- Quality Measure Definitions
- National Quality Goals and Benchmarks

Suggested Uses for This Material

- Use for training new quality improvement staff
- Share with board of directors when presenting quality improvement reports
- Share with health care clinicians to increase awareness of importance of improvement efforts on UDS measures

This section of the toolkit includes in-depth information on each quality clinical measure. The datasets include health center performance reported through Uniform Data System (UDS), HEDIS or QIP data reports. The datasets included in this section of the toolkit include the following:

Primary Prevention
- Cervical Cancer Screening
- Breast Cancer Screening
- Colorectal Cancer Screening
- Prenatal and Postpartum Care
- Depression Screening and Appropriate Follow-Up

Immunizations
- Childhood Immunizations
- Immunizations for Adolescents

Tertiary Prevention
- Controlling Diabetes
- Controlling High Blood Pressure
- Tobacco Screening and Cessation
- Adult Weight Assessment and Counseling
- Asthma Medication Ratio

Well Child
- Child and Adolescent Well Care Visits
- Child and Adolescent Weight Assessment and Counseling
